JEV | decision-architecture reconstruction

Observed · Candidate · Prior-only / U

Conceptual paths and evidence links, not recovered physical wiring.

State accounting

$u(q,s) = 259$
$+ state_cost(s) + 12.0q$
Affine ledger; $R^2 = 1.00$

L1/L2 · P18/P22

Question branches

State effect +0.98
Sibling effect 0.00
$n = 10$; $p = 2 \times 10^{-4}$

L2 · P18 powered

Choice organization

Semantic options
Jointly normalized
Permutation-invariant

L2 · P18

Core candidate

Decoder-compatible: 0.76
Alternatives retained

L4 · P19 / knowledge

Tokenizer / serving

Reference unmatched: 58.3%
Cache CI crosses zero

U · P02/P09

Sparsity / size

Dense/MoE 0.50/0.50 prior
No routing signal

U · P11 (prior-only)

Decision readout

Single-pass-compatible heads: 0.94
Fixed 38-token output

L4 · P18/P22 controls

Additional evidence / limits (not execution stages)

Knowledge probe

17 MCQs / 15 facts answered
Broad core plausible

L4 · P12

Physical prefill

Shared-state accounting measured
Physical sharing unresolved

U · attestation needed

Quantitative boundary - not an execution stage

Width, depth and expert count remain unresolved (U).

Functional organization above does not establish physical weight sharing.
